WHY ROSETTA?

Rosetta Hardscapes combines the rugged attractiveness of natural stone with the dimensional consistency and engineered benefits of precast concrete. Rosetta is cast in molds taken from actual weathered stone, and inspired by innovative concrete designs giving it a rich, textured surface that captures the look and feel of nature in every block. Our wetcast concrete hardscape products will give you endless options to create landscape designs that will appear as though they were born, rather than built.

Rosetta is dedicated to embracing and creating ways to think different, see different, and be different by creating uniquely beautiful engineered products that eliminate the difficult decision between form and function.

Before

ENGINEERED FOR STRENGTH & SPEED

The massive interlocking blocks maximize structural stability and ease of installation.

Rosetta products are often installed twice as fast as comparable natural stone.

Simple lifting tool increases installation speed and safety

Highly attractive texture, color, and shape

Interlocking lugs make walls easy to engineer

Consistent dimensions make installation fast and easy

ENGINEERED FOR PERFORMANCE

CHANGE YOUR VIEW

At Rosetta, we are founded on the belief that our products should always compliment the natural environment and never compete with it. The true beauty evolves when the individual products disappear and the landscape as a whole becomes the focus. Is Rosetta the missing piece of your project's puzzle?

A large backyard pool area featuring a stone retaining wall, a fire pit, a pergola, and a lawn. The pool is surrounded by a stone wall, and there is a fire pit with red chairs nearby. A pergola with white columns is over the pool deck. The lawn is green and has some plants. The stone wall is made of light-colored stones and has some lights embedded in it. The pool is blue and has some people in it. There are lounge chairs and a table on the pool deck. A basketball hoop is visible in the background. The overall scene is a well-maintained and inviting outdoor space.

THIRD GENERATION FAMILY BUSINESS

HOW IT ALL BEGAN

Rosetta Hardscapes launched in Charlevoix, Michigan in 2007—The brainchild of three brothers who had spent their entire careers in the construction industry.

Responding to the need for a hardscape product that mimicked the colors, textures and shapes of natural stone the first product Rosetta developed was the Outcropping Collection.

As a larger scale wall solution that creates grand walls that truly capture the look of natural stone, Outcropping was met with success on a local level. Since 2007, several Rosetta manufacturers have joined the Rosetta team—covering select markets in the United States, Canada, Europe, Asia, and the Middle East.

GROWING AND INNOVATING

Beginning with the Outcropping Collection, early advances included the development of a complete line of hardscape products.

The complete line of Rosetta wet-cast, concrete products gives Rosetta an appeal in every market—within the landscape architecture community, among the landscape contractor market, and even in the do-it-yourself homeowner crowd. This creates an opportunity to promote Rosetta across a range of specifiers and customers.

Rosetta’s innovative engineering resources include on-staff engineers, wall layout software, design charts, construction details and much more. These resources are available both in print and online and are constantly being improved and updated.

Rosetta’s full-time R&D department is constantly striving to find opportunities for product improvement and development.

We want you to feel comfortable and confident when starting your project. That’s why we make sure you have the resources you need to get the job done right. Everything we make, we back with a limited lifetime warranty.

ROSETTA OF MICHIGAN LIFETIME LIMITED WARRANTY

Rosetta hardscape products as manufactured by Rosetta of Michigan are backed by a lifetime warranty from the manufacturer to the original end user, for products used in residential applications. This assurance of product quality is applicable where products have been correctly installed to manufacturer’s specifications. Any properly installed hardscape material manufactured by Rosetta of Michigan that deteriorates due to the concrete in the product not meeting the design strength specification will be replaced by the manufacturer. The following items are not covered by this warranty: color variances and the appearance of surface stains resulting from chemical reactions such as efflorescence or differential curing; damage caused by installation; deterioration caused by de-icing salts or fertilizers; damage resulting from sub-grade settlement or movement, hairline cracks that do not effect the structural performance of the product, spalling of less than three percent of the surface area, contact with chemicals or paint, discoloration due to airborne contamination, staining, oxidation, or improper sealing. Products purchased must be registered with the manufacturer within 60 days of end user’s purchase for warranty to be valid.

All warranty claims must be made prior to the removal or disposal of the defective product; Warranty claims will be reviewed by a company representative and may require samples of defective product for analysis. Warranty does not include removal, installation or transportation to replace the material. Warranty is not transferable and is extended to the original end user only. Proof of purchase is required.

Please note:

- Actual colors may vary from the color swatches shown in this book. Final color selection should be made from actual color samples, which are available from your local dealer.
- For the most natural appearance, install products from multiple pallets simultaneously. This will create a more blended, natural look.
